

## ***Statement of Deficiencies***

### **1725.A.-C.: Medication Management Training**

**Not Met**

1725.A.-C.: A. All staff members who administer medication shall have medication administration training.

B. Whether the center is administering medication or not, each early learning center shall have at least two staff members trained in medication administration and at least one on the premises. A staff member who is a licensed practical nurse (LPN) or registered nurse (RN) with a valid nursing license shall be considered to have medication administration training.

C. Such training shall be completed every two years with an approved child care health consultant.

#### **Finding:**

1725.A. Based on record review/interview at approximately 11:03 AM, S1 failed to have proof that she was trained in medication administration prior to administering medication to C5, age 4, on 12/18/2019 as evidenced by the center's medication authorization form.

Corrective Action Plan: S1 stated that she has medication administration training; however, she had to pay for another certificate and its has not arrived yet. She stated she has not administered medication since 12/18/19 and will place the certificate in her file as soon as she gets it.
