

Statement of Deficiencies

7315-A: Child-to-Staff Ratio

Not Met

7315-A: Child/staff ratios are established to ensure the safety of all children. Only those staff members directly involved in child care and supervision shall be considered in assessing child/staff ratio. Child/staff ratios shall be met at all times as the number of children supervised by one staff person shall not exceed the ratios as indicated below; however, there shall always be a minimum of two child care staff present during hours of operation when children are present:

Ages of Children	Child/Staff Ratio
Infants under 12 months	5:1
One year old	7:1
Two year old	11:1
Three year old	13:1
Four year old	15:1
Five year old	19:1
Six year old and up	23:1

An average of the child/staff ratio may be applied to mixed groups of children ages two, three, four, and five. Ratios for children under two or over five years old are excluded from averaging. When a mixed group includes children less than two years of age, the age of the youngest child determines the ratio for the group to which the youngest child is assigned. When a mixed group includes children both older and younger than six years old and older, the ages of the children less than six determine the ratio for the group. During naptime, required staffing shall be present in the center to satisfy child/staff ratios.

Finding:

7315-A Based on observations:

The provider did not have the required staffing present in the center during naptime to satisfy child/staff ratio as evidenced by 15 children age 2-4 year old present with 1 staff. Specialist observed after pulling up to the center a staff member pulled up also and went into the center. There were 3 staff in the center that includes the staff that just arrived. There were 15 kids in the nap area and 5 infants in the baby room.
