Finding:

1711-A-B-D-G Based on observations: The Center failed to meet the required child to staff ratio for children at all times. Specialist observed 20 children ages 3,4 and 5 years old with one staff member (S10). The required average ratio for children of this age is 15 children per 1 staff person. S1 stated that she was assisting S10 in her classroom before being called to the front office due to specialist arrival. S11 arrived to the center within 5 minutes of specialist observing the classroom out of ratio. S11 immediately reported to the classroom with S10 placing the classroom within child to staff ratio requirements.
