

Statement of Deficiencies

7312-E.5: CPR/PFA Vehicle

Not Met

7312-E.5: At least one staff in each vehicle (center provided or contract) shall have documentation of current infant/child/adult CPR certification and pediatric first aid certification.

Finding:

NEW

There was not at least one staff in each vehicle (center provided or contract) with documentation of current approved Pediatric First Aid training for the AM daily transportation services. Per S1, she drives and S2 rides with her for the morning daily transportation run. Per center records, neither S1 nor S2 has documentation of PFA training. S1 stated she received this training when she received her CPR training in October 2011. Specialist observed this documentation and the card, from the American Heart Association, is entitled Healthcare Provider and the listed subjects included CPR and AED; it did not denote PFA training was included. Specialist informed the director if PFA was included then they provided her the wrong card; the card should be entitled Heartsaver Pediatric First Aid or Heartsaver First Aid CPR/AED. Specialist informed the director to contact the instructor and have them issue a corrected card verifying she received this training. In the meantime, specialist informed the director there is supposed to be at least one staff member in the vehicle with documentation of this training.
