2. Child to staff ratios for children under age two are excluded from averaging.
3. When a mixed age group includes children younger than age two, the age of the youngest child determines the child to staff ratio for the group.
4. An average may be applied to a mixed age group consisting only of children ages 5 and older.

Finding:

1711-A-B-D-G Based on observations: The Provider failed to meet the required child to staff ratio for children of the following ages: 17 children age two through five (one 5 year old, one 4 year old, six 3 year olds and nine 2 year olds) with 1 staff. The required ratio for children of this age is 15 children per 1 staff person. Upon arrival, Specialist observed 17 children in classroom #1 and S1 present near the entrance of classroom #3 leaning over the half door. During this time, there was no other staff present with the children in classroom #1. Two additional staff members were observed present but in Classroom #3 (the infant room). Provider corrected prior to Specialist departure.
