

Statement of Deficiencies

1903.C.: Free of Hazards

Not Met

1903.C.: Indoor and outdoor areas shall be free of hazards.

Finding:

1903.C. Based on observations on 04/01/19, the indoor area were not free of hazards as specialist observed two pairs of children scissors, a stapler, and a glue stick on the changing table in the room with the infant/1 year olds. At the time there were 5 children (ages 7 months-12 months of age) present in the room with S2. None of the children were observed on the changing table at the time. The items were moved to a shelf above the sink in the room. In another room that is occasionally used by children 5 years and up (per S1) , specialist observed a hammer and two screw drivers. S1 was advised and the items were removed from the room. No children were present in the room at the time.
