

Statement of Deficiencies

1711.H.: Rest Time - Minimum Child to Staff Ratio

Not Met

1711.H.: Rest Time - Minimum Child to Staff Ratios

1. Sufficient staffing needed to satisfy child to staff ratios shall be present on the premises during rest time and available to assist as needed.
2. Children ages one and older may be grouped together at rest time with one staff member in each room supervising the resting children.

Finding:

1711.H. Based on observations on 05/02/2019, S1 failed to ensure that rest time ratio was met as evidenced by when Specialist arrived S2 was observed monitoring 2 rooms of children. One room consisted of 9 children ages 8 months to 3 years and the adjoining room consisted of 7 children ages 2 - 3 years. Ratio must be met at all times when children under age one are included. According to the required ratios, S2 could only monitor 5 children due to one of the children being under the age of one year. The ratio was corrected when S1 went into the rooms to assist.

1725.A.-C.: Medication Management Training

Not Met

1725.A.-C.: A. All staff members who administer medication shall have medication administration training.

B. Whether the center is administering medication or not, each early learning center shall have at least two staff members trained in medication administration and at least one on the premises. A staff member who is a licensed practical nurse (LPN) or registered nurse (RN) with a valid nursing license shall be considered to have medication administration training.

C. Such training shall be completed every two years with an approved child care health consultant.

Finding:

1725.A.-C. Based on interviews on 03/14/2019, the center did not have at least two staff members trained in medication administration whether the early learning center administers medication or not. Provider has the class scheduled for today, 05/02/19.
