

Statement of Deficiencies

1723.A.&B.: CPR Certification

Not Met

1723.A.&B.: A. Infant and child CPR. Fifty percent of staff members on the premises of a center and accessible to children, or at least four staff on the premises and accessible to children, whichever is less, shall have current certification in infant and child CPR through training approved by the department.

B. Adult CPR. Fifty percent of staff members on the premises of a center and accessible to children, or at least four staff on the premises and accessible to children, whichever is less, shall have current certification in adult CPR through training approved by the department.

Finding:

1723.A.:Based on record review: The Provider failed to have fifty percent or at least four staff on the premises and accessible to children, whichever is less, with current certification in infant and child CPR training approved by the department. The Specialist observed that S12, S14, and S15 are the only staff on the premises during the visit, with current CPR training.

1723.C.: Pediatric First Aid

Not Met

1723.C.: Pediatric First Aid. Fifty percent of staff members on the premises of a center and accessible to children, or at least four staff on the premises and accessible to children, whichever is less, shall have current certification in pediatric first aid through training approved by the department.

Finding:

1723.C. Based on record review: The Provider failed to have fifty percent or at least four staff on the premises and accessible to children, whichever is less, with current certification in Pediatric First Aid training approved by the department. The Specialist observed that S12, S14, and S15 are the only staff on the premises during the visit, with current Pediatric First Aid training.

1725.A.-C.: Medication Management Training

Not Met

1725.A.-C.: A. All staff members who administer medication shall have medication administration training.

B. Whether the center is administering medication or not, each early learning center shall have at least two staff members trained in medication administration and at least one on the premises. A staff member who is a licensed practical nurse (LPN) or registered nurse (RN) with a valid nursing license shall be considered to have medication administration training.

C. Such training shall be completed every two years with an approved child care health consultant.

Finding:

1725.A.-C. Based on record review: The center failed to have at least two staff members trained in medication administration and at least one on the premises. No staff on or off the premises had current medication administration training. Staff medication administration training expired May 23, 2018.
