

Statement of Deficiencies

1725.A.-D.: Medication Management Training

Not Met

1725.A.-D.: A. All staff members who administer medication shall have medication administration training.

B. Whether the center is administering medication or not, each early learning center shall have at least two staff members trained in medication administration and at least one trained staff member on the premises during the hours of operation. A staff member who is a licensed practical nurse (LPN) or registered nurse (RN) with a valid nursing license shall be considered to have medication administration training.

C. Such training shall be completed every two years with an approved child care health consultant.

D. Documentation of current completion of such training shall be maintained by the center and shall be available for on-site inspection, whether as hard copies or in electronic form, upon request by the department.

Finding:

1725.A.-D. Based on record review: At approximately 10:22 a.m., S1 failed to have current documentation of training in medication administration completed with an approved Child Care Health Consultant. Training is required every two years, training was given on 1/25/2020 and the staff's training expired 1/25/2022. S1 contacted an approved trainer by the department, that scheduled medication administration training for a class this evening.

Corrective Action Plan: Effective 6/3/2022, S1 stated she will set a reminder 90 days prior to staff's certification due to expire for timely completion, and ensure compliance with this regulation.
