

Statement of Deficiencies

1725.A.-D.: Medication Management Training

Not Met

1725.A.-D.: A. All staff members who administer medication shall have medication administration training.

B. Whether the center is administering medication or not, each early learning center shall have at least two staff members trained in medication administration and at least one trained staff member on the premises during the hours of operation. A staff member who is a licensed practical nurse (LPN) or registered nurse (RN) with a valid nursing license shall be considered to have medication administration training.

C. Such training shall be completed every two years with an approved child care health consultant.

D. Documentation of current completion of such training shall be maintained by the center and shall be available for on-site inspection, whether as hard copies or in electronic form, upon request by the department.

Finding:

1725.A.-D. Based on record review at 1:13 p.m., S1 failed to have at least one staff member on the premises trained in medication administration. S1 and S2 are both on leave for today but will be back tomorrow. S20 contacted a approved trainer to schedule a medication management training for herself and two other staff members for July 2022.

Corrective Action Plan: Effective 6/27/2022, S20 stated she will keep at least two staff members trained in medication management on premises at all times, to ensure compliance with the regulation.
