1507-A: Daily Attendance Records - Children

Not Met

1507-A: A daily attendance record for children shall be maintained that shall:

1. include the child's first and last name, arrival and departure times, and first and last name of person or entity to whom the child is released;
2. accurately reflect children on the center premises at any given time; and
3. be used to sign in and out if a child leaves and returns to the center during the day.

Finding:

1507-A Based on record review:

The center's daily attendance record for children did not accurately reflect the children on the child care premises at any given time as 27 children were present and children were signed in on the log at 8:45 am on 8/22/18. This was corrected during the licensing visit.

3. When a mixed age group includes children younger than age two, the age of the youngest child determines the child to staff ratio for the group.

Finding:

1711-A-B-D Based on observations and records: The required child to staff ratio was not met for children of the following ages: 15 children age 1-4 years with 1 staff. The required ratio for children of this age is 7 children per 1 staff person. During the initial walk through of the center at 8:45 am the child staff ratio was not met as 15 children were observed by the Specialist with 1 staff member. The child/staff ratio was not met from 8:41 am until 8:47 am according to child attendance records. A second staff member, S2, arrived at 8:47 am and the child/staff ratio was met at this time.
