2. Child to staff ratios for children under age two are excluded from averaging.
3. When a mixed age group includes children younger than age two, the age of the youngest child determines the child to staff ratio for the group.
4. An average may be applied to a mixed age group consisting only of children ages 5 and older.

Finding:

1711-A-B-D-G Based on observations/interview(s): The Provider failed to meet the required child to staff ratio for children of the following ages: 11 children age one through two (5 one year olds and 6 two year olds) with 1 staff. The required ratio for children of this age is 7 children per 1 staff person. Specialist observed S2 supervising 11 children ages one through 2 alone. Specialist observed S5 in the kitchen preparing breakfast during this time. S5 stated that she is usually responsible for supervising the two year old children and stepped away to get breakfast. Specialist observed S5 remain with the 6 two year olds and S2 continued supervising the 5 one year olds. Specialist found that child to staff ratio was met prior to departure.
