

## Statement of Deficiencies

### 1725.A.-C.: Medication Management Training

Not Met

1725.A.-C.: A. All staff members who administer medication shall have medication administration training.

B. Whether the center is administering medication or not, each early learning center shall have at least two staff members trained in medication administration and at least one on the premises. A staff member who is a licensed practical nurse (LPN) or registered nurse (RN) with a valid nursing license shall be considered to have medication administration training.

C. Such training shall be completed every two years with an approved child care health consultant.

#### Finding:

1725.A.-C. Based on record review: S8 did not have at least two staff members trained in medication administration whether the early learning center administers medication or not when requested by Specialist at 11:35 a.m. The medication administration training of center staff with this certification expired in May 2020. S8 allowed a staff member not certified in medication administration with an approved CCHC to administer medication. S1 administered medication to C1, a one year old child, on 8/19/2020, 8/19/2020, 8/21/2020, 8/31/2020 and 9/17/2020 without certification in medication administration.

Corrective Action Plan - S8 stated she will have at least two staff trained in medication administration by next week. Staff will be scheduled to take this training on 9/25/2020. S8 stated effectively immediately, staff will not administer medication until certified in medication administration.
