

Statement of Deficiencies

1903.C.: Free of Hazards

Not Met

1903.C.: Indoor and outdoor areas shall be free of hazards.

Finding:

1903.C. Based on observations/interviews: On 11/12/19, Specialist conducted a walk through at 9:15am and observed that the indoors was not free of hazards as there was a portable heater unit on the floor of Classroom 1, which was accessible to the children. Specialist felt the surface of the heater which it was hot and would burn the children if they were to touch it. S1 stated that the schools heating unit does not work on 1 side of the hallway and she is not sure of when it will be fixed. Specialist informed S1 that the heater would have to be moved out the children's reach. S1 moved the heater behind the shelves in the classroom which was no longer a hazard to the children.
